Dear Mr. Prosser,

Please find this correspondence a notice of support for your efforts to educate citizens and legislators regarding traumatic brain injuries.

As you may be aware I recently held a conference regarding the needs of Floridians who suffer catastrophic injuries in automobile accidents including brain injuries and spinal cord injuries, I too possess a passion for finding solutions to better serve these citizens. I believe we need positive change which includes a superior model for the delivery of care including aggressive and persistent therapies in all disciplines of rehabilitative medicine.

I am aware of your book "**The Educated Consumers Guide to No-Fault Automobile Insurance**" having been given a copy by Mr. Erick Collazo the Chairman of the Governor's advisory board committee charged with developing the strategy necessary in order to advance a superior model for the delivery of services. I am also aware of your free video "**The Solution for Brain Injuries and Bankruptcies**" which I saw on the website [www.neurotraumaassociation.com/florida](http://www.neurotraumaassociation.com/florida). Please share my congratulations with the association members for their persistent and determined effort to manifest positive change here in Florida.

I intend to request your presence and testimony, when I present a bill on Traumatic Brain Injury next year in the Florida House of Representatives in the spring of 2011. While the details of this bill have not been finalized, this bill will show my vision for how to benefit those, including their families, who suffer from a TBI.

I look forward to working with the Florida Neuro Trauma Association as they continue to educate their, employees, friends, families, local media and Legislators regarding a solution which we so

desperately need here in Florida. Please thank the members for their time and effort to bring about this very positive change and tell them I am endorsing their efforts vigorously and to please call upon me if I can help in any way.

Sincerely,
